**FISCAL IMPACT STATEMENT**

**LS 7542**

**BILL NUMBER: SB 557**

**NOTE PREPARED: Jan 12, 2011**

**BILL AMENDED:**

**SUBJECT:** Renewable Energy.

**FIRST AUTHOR:** Sen. Hershman

**FIRST SPONSOR:**

**BILL STATUS:** As Introduced

**FUNDS AFFECTED: X GENERAL  
DEDICATED  
FEDERAL**

**IMPACT:** State & Local

**Summary of Legislation:** This bill requires the Indiana Utility Regulatory Commission (IURC) to consider in the rate base of a public utility that complies with certain renewable energy standards (RES) any capital expenditures made by the public utility to extend gas or electric service to a customer that produces biofuels. It requires the IURC to provide certain financial incentives for implementing electric line facilities projects to electricity suppliers that comply with a certain RES. It requires electricity suppliers to comply with an RES by specified dates. The bill also provides that an electricity supplier that does not comply with a higher RES is not eligible for certain financial incentives related to renewable energy development.

It changes the term "clean coal and energy projects" to "clean energy projects" to allow the term to include low carbon dioxide emitting or noncarbon dioxide emitting energy production or generating facilities. This bill provides that: (1) low carbon dioxide emitting or noncarbon dioxide emitting energy production or generating facilities; and (2) purchases of energy produced by such facilities; qualify for the financial incentives available for clean energy projects. It provides that a combined heat and power facility qualifies as a renewable energy resource for purposes of the statute that provides financial incentives for clean energy projects. It also provides that an eligible business may recover qualified utility system expenses, which include specified preconstruction costs, associated with a: (1) new energy production or generating facility; or (2) low carbon dioxide emitting or noncarbon dioxide emitting energy production or generating facility.

**Effective Date:** Upon passage; July 1, 2011.

**Explanation of State Expenditures:** *IURC:* This bill will increase the administrative expenditures of the IURC. The bill will also require the IURC to amend rules and procedures related to consideration of public utility rate adjustments for cost recovery. The IURC's current level of resources could be sufficient.

*IEDC:* This bill will increase the administrative expenditures of the IEDC. The bill provides that the IEDC, in consultation with the IURC, will develop a strategy to attract renewable energy manufacturing and assembly facilities to Indiana. The current level of resources available to the agency should be sufficient to implement these provisions.

*State & Local Utility Expenditures:* This bill could increase expenditures by state agencies and local units for utilities to the extent that the provisions allowing for cost recovery would increase utility rates. The overall impact on expenditures is indeterminable.

**Explanation of State Revenues:** It is estimated that utility rates could increase under the bill due to the provisions in the bill allowing for reasonable and necessary cost recovery for electric line facilities projects, qualified utility system expenses and compliance with renewable energy standards in the bill. To the extent that utility rates are affected by the provisions in this bill, there will be an impact on Sales Tax, Utility Receipts Tax (URT), and Utility Services Use Tax (USUT) collections.

*Taxes:* The rate for both the URT and USUT is 1.4%. The URT is calculated on the gross receipts of all entities providing the retail sale of utility services in Indiana. The USUT is imposed on the retail consumption of utility services in Indiana. Both the URT and USUT are deposited in the state General Fund. Sales Tax revenue is deposited in the state General Fund (99.178%), the Public Mass Transportation Fund (0.670%), the Commuter Rail Service Fund (0.123%), and the Industrial Rail Service Fund (0.029%).

**Background Information-** This bill establishes an incentive program to allow an electricity supplier that complies with certain renewable energy standards to recover costs associated with any capital expenditures made by the electricity supplier. As used in this bill “electricity supplier” means a public utility (as defined in IC 8-1-2-1) that furnishes retail electric service to the public. The terms does not include municipally owned utilities.

In order to qualify for a financial incentive, an electricity supplier must supply electricity that is generated from renewable energy resources to Indiana customers as a percentage of the total electricity supplied by the electricity supplier to Indiana customers during a calendar year. The bill provides that an electricity supplier who elects to comply with *Schedule 1* is eligible for financial incentives:

*Schedule 1 -*

- (1) Not later than the CY ending December 31, 2012, at least 3%.
- (2) Not later than the CY ending December 31, 2017, at least 6%.
- (3) Not later than the CY ending December 31, 2022, at least 10%..

If the electricity supplier fails to comply with *Schedule 1*, the electricity supplier is no longer eligible for financial incentives and must comply with the schedule set forth in *Schedule 2* beginning in the compliance year in which the electricity supplier failed to comply with the schedule set forth in *Schedule 1*. However, an electricity supplier is not required to comply with either schedules if the cost of compliance would result in unreasonable increase in rates to its customers. The bill provides that the IURC may extend the deadline for compliance.

*Schedule 2 -*

- (1) Not later than the CY ending December 31, 2012, at least 1.5%.
- (2) Not later than the CY ending December 31, 2017, at least 4%.

(3) Not later than the CY ending December 31, 2022, at least 7%.

**Explanation of Local Expenditures:** See *State & Local Utility Expenditures* section under Explanation of State Expenditures.

**Explanation of Local Revenues:** See *Explanation of State Revenues*.

**State Agencies Affected:** IURC, IEDC; All

**Local Agencies Affected:** All.
